at San Francisco in the English ship Land O'Cakes, disembarked at Long Wharf. The Alta says:—

The wharf was covered for a long distance with a perfect forest of backet hats and long tails, rolls of matting and boxes were turned over in all directions, long poles were flourished extensively, and each one appeared to be talking in self defence, making a noise resembling a ficek of crows discussing the merits of a cornfield. A large number of persons were collected around, attracted thither by the noise and confusion incicental to the disembarkation of these followers of Confucius. Matters were at last apparently satisfactorily arranged, when each one shouldering a load that would test the strength of a dray horse, started up into the city in single file, to such places as were provided for them by their brethren.

A Chinese funeral procession passed through the streets of San Francisco, which is thus chronicied. The attendants, numbering between forty and fifty persons, were mounted on herselack, and followed the hearse in double file. Each one had a white ribbon on the right breast of his coat, as an emblem of the innocence and purity of him where spirit had departed to the other world.

The Alta California, of the 24th of March, says:—"On Monday evening, about eight o'clock, a serious riot occurred on Jackson street, near liattery, which arose from a dispute in relation to the title of the property, and the attempt made by one party to dispossess the other. From the affidavits made by the party in possession. and from the primary examination of a party present, the following faces are gathered in relation to the affair. It seems that the property in question has been involved in litigation, and that about two weeks since Mr. E. A. Hodges was placed in possession of the property, the same having been leased by Messrs. J. C. Swain and G. L. Warner, from Meers. Palmer. Cook & Co. An attempt had previously been made to oust the parties in possession, but without effect. On Monday evening, at the time that the bell of the Monumental Engine Company sounded the alarm, a body of persons, numbering forty or fifty, preceded to the premises mentioned, and commenced the assault by lattering down the doors with pieces of timber. The doors soon gave way, a breach was made through the partition from an adjoining building, and the assailing party once having effected an entrance, commenced emptying the store of its contents, which consisted of flour and liquors. During the meior several persons were knocked down, and at least a dozen shots fired, none of which took effect, though the marks are visible on the walls. SAN FRANCISCO, April 1, 1852. The News and the Markets--- Marriage of Captain Sutter's Daughter--- Delegates to Baltimore --- Wreck of the North

America ... City Licenses, &c., &c. Very little has transpired in California since the sailing of the last steamer. The "oldest settler" never experienced such duliness as is now complained of, and there is every reason to believe that the stagnation will continue until there is a dearth in the markets of all kinds of goods, and until prices of all commodities reach a very high rate. Indeed, there are some symptoms of a scarcity as it is. The market is nearly bare of many things; and unless there be arrivals from the eastward soon, the miners will be forced to pay prices as great as those which ruled a year or two Butter has suddenly risen from fifty to seventy five cents a pound. Mess pork is worth \$19 a barrel, and prime \$16. There is a great scarcity of printing paper too, and the daily journals have to pay as high as \$10 ream for it. This unconstitutional price will be sub-

mitted to just so long as the proprietors can't help it. but Miss Sutter, daughter of the celebrated Captain Sutter on whose premises the first discovery of gold in California was made, was married a few days ago to a Mr. Engler. The wedding was a grand affair. As Captain Sutter has figured extensively in history, and is probably as well The wedding was a grand affair. As Captain Sutter has figured extensively in history, and is probably as well known as General Scott, the following account of this great wedding will, no doubt be read with considerable interest. A gentleman from Sacramento says:—that at an early hour in the afternoon the invited guests from Sacramento and Marysville approached the Hock Homestead about the same time, and wore received with a welcome that made both earth and air tremble with the vibrations of gladness. As the boats were making the bend in the river, which completely concealed the farm, the roaring of cannon, rapidly fired, and the ringing of belts, announced that they were in the neighborhood of that cordial and comprehensive hospitality which Capt. John A. Sutter has made so prominent a part of the history of this country. After the parties had landed from the Bragdon and from the Marysville bout, they proceeded to the Captain's mansion, where they were warnly greeted, and where the ladies and gentlemen made special preparations for the anticipated ecremony. Having waited at this place for a couple of hours in vain for the arrival of the Camanche, they formed a procession and marched to a chapel, which the Captain's had creeted for the benefit of the Indians upon and about his ranch. Everything about the entire permises had been put into the finest order, the buildings ornsmented and footoned with flowers and every prominent point surmounted with special taste, and surrounded with about fifty Indians dressed in an array of edors not move brilliant than anomalously blended. As the procession entered the chaped, a large band filled the iron walls of the building with the richest eches of functed metals of the building with the richest eches of functed metals of the congenial trements of a long-life bondaye. This correspond to the mansion, soon afterwards the Camanche arrived with a fresh delegation and instead of a re-performance of the nuptial ecrementy for the bunefit of the new comers the whole party were seate wife."

Several persons were examined, but the investigation resulted as all such inquiries usually do, in nothing. It is very likely that bribery was used, but there is no question the parties whom it was sought to implicate were bismeless. In fact, it is generally supposed that the investigation was set on foot for the single purpose of trying to put down a few prominagt men, who stand in the way of some of our aspiring politicians.

I informed you in my last of the wreck of the steamship North America, of the Vanderbilt line. Since then we have heard but once from the passengers who were left at Acapulco. A correspondent, writing from Acapulco, says:—The number of destitute passengers is indeed very large, and the fund raised comparatively small, and will soon be expended; after which I do not see how they are to subsist. Many passengers at the present time are sick with the meales and fever, and the number is increasing daily. There will unquestionably be much suffering among the passengers and how they are to raise means to leave this place is a quostion which i am unable to solve. Many rely upon the citizans of San Francisco sending a steamer down expressly to convey the passengers from here to California. One death has occurred, a son of Mr. Nocross, from Philadelphia, aged four years. The North America still holds together, and will continue to do so for a long time, unless a gale should spring up. A sale of some of her bedding, furniture, crockery. &c., took place on the 13th; the articles brought but little more than enough to pay the expense of transporting them from the week to this place. Of these, 485 have entered the public schools, and the average age of all the pupils does not exceed seven and a half years, although they embrace all ages from four to seventeen years.

Since the reorganization of the Vigilance Committee

years.

Since the reorganization of the Vigilance Committee, crime has very sensibly decreased in San Francisco. The members of that body patred the streets at night, and it is understood that the first-burglar or robber who is caught, will be executed in a very summary manner.

A bill was introduced into the Legislature a short time since for the suppression of gambling, but it was defeated in the Senate by a tie vote. I am happy to say, however, that public epinion is decidedly opposed to gambling, and that, in a short time, it will cease to be one of the characteristics of California. Very few respectable people now visit the gambling shops. A movement is being made to suppress the buil and bear fights which take place every Sunday, at the Mission Dolores; and I think these disgraceful exhibitions will soon be put an end to. "Koesuch, the great fighting bear in California," as the placeneds have it, will, in such case, be consigned to Barnum.

According to information received here, the immigrathou into California, across the Plains, will be very exten-sive this year. It is feared that those who start too soor will suffer for the want of grass. In order to meet the case in time, the following recouldons have been intro-duced into the Legislature:—

Mining Intelligence.

The Stockton Journal, of the 25st starch, says:—
The miners in the guiches around Agna Free Creek and Maliposa river, have been making good wages and an occasional. Tucky strike," since the rain. Many who had left that region for the Frizon San Joaquin, and coarse and Fine toul fulcher, before the rain might now do well had they remain d.

There are a few men working in the surface mines around Eurn. Creek, most of them who were waiting for rain leaving left about six weeks ago for the placest further such. The quark mills on the Wadragton vin and vein No. Nine, near quartisping, are now doing well. A shareholder in the Wachington viels states that it was yielding tool per day. A rich vein of decomposed quarts and clate has just been document near far furahem, house about a mile and a half from Quartelling.

trahem's house, about a faile and a faile from Quarter-tury.

Operations in Bear Valley have been suspended, on account of the freshet. The rich intal has caved in, and could believe will be required to re-openit. Mr. Gra-ham has been informed that the lead runs into the next cisin, which by the True Han Company, who took out I 000 lbs. of autrifrous date before the rain. Three petude of this faite yielded \$8. It will be ground as scon as in crasting, now grinding side from the real tola-ied in engaged. It is our opinion from what we know and hear of Marijeria county that as soon as the miners of that region have account that as soon as the miners of

Merced. Marijosa. Agua Frio and Burna', have been rich, and are still, in many places.

The Calveras Chronicle reports that the miners in every of rection are doing remarkably well. Provisions of all linds, especially flour, were searce and in demand. That Chronicle says that tunneling for gold has recently been adopted in the region of Mokelumne Hill. One of the tunnels in Corral Hill has yielded a large amount of gold. One man, who paid \$600 for a share, on Thursday, had his money returned from the proceeds of the claim before Friday evening.

The El Dorado News, of March 20, states that from every part of that section of the mining country, the most cheering accounts were received of the prospects of the diggers. There is now plenty of water in most of the ravines, and miners are busily employed in using it. No complaints were now heard, either for the want of water or ground to work. Many are working 'old ground,' while a great many are digging in flats and ravines that have heretofore remained untouched. Provious to the rain the streets of El Dorado were filled with idle men; but now the scene is very different. All day long the town seems to be described; but towards night, miners may be seen coming in from every quarter, having earned from four dellars to ten dollars to the man.

The Shata Courier of March 27, reports rich discoveries of gold on Reque river, near the Oregon trail. The nines in Shasta valley were being profitably worked. Ten dollars per day, says that paper, is under rather than over the general average to the mining hand. Fire thundred persons left Shasta valley on hearing of the rich discoveries on Rogue river. Much confidence is placed in the reports.

Trade is good in Marysville. Pack mules and teams throng the streets, and are loading for the mines. The weather has become warmer and more pleasant. A company of thirty men are engaged in running a tunnel into the "second trench" of Dungan's Flat, they have already run through the zolid rock one hundred feet, and expect to go through fi

San Francisco, Thursday, April 1.—There is quite an improvement manifest in all departments of trade to-day. Goods going off finely, and at improved rates. The market is full of buyers from Sacramento and Marywille, besides a goodly number from the interior. Flour remains unchanged; we hear of small lots going off at \$9 a 9%. Candles—There is a speculative movement in candles. Yesterday, small sales were effected at \$98. for Adamantine, and this morning we have heard of large lots being disposed of at \$9 a 40%. Candles—There is a speculative movement in candles changed hands at 42 a 43c. Some holders are asking as high as 44c. Whiskey.—There is also an active demand for whiskey, but we have heard of no large sales. We heard of one lot of 10 and one of 100 barrels changing bands at 56c, per gal. Butter.—Butter is held at 75c. That per the John Bertram will be in the market in a day or two. We have heard of no sales of importance. Freights.—Freights plentiful at \$5 to Sacramento, and \$15 to Maryswille. Sugar.—The balance of the cargo of the ship Brant, amounting to upwards of 500.0000 pounds, has been purchased by one of our largest firms at prices not transpired, and withdrawn from the market. Stocknox, March 20.—Perhaps there has not been a week, since the opening of the present year, in which our merchants have enjoyed greater general prosperity than during that which has just passed. The roads have again become hard and dry, and, in consequence, the rates of freight have been reduced. Traders have seized upon the opportunity thus offered, and have made heavy purchases to answer the demand which exists at the present time, in nearly every mining camp. Our advices, from all parts of the mines are of the most cheering nature, assuring us that, with a sufficiency of water for mining purposes, we need have no fears of the exhaustion of the mineral wealth of California. Money appears plenty, and can be had at easy rates. We perceive a small advance in the price of first quality dams, which we quote at 22c, a 25c. First quality of butter is also firm, at 023c, a 65c. Imported lard, in kegs, 35a a 40c. English dairy cheese, 15c, a 17c. Clear pork, in half barrels, temains 6rm, at \$14 25 a \$15 per half barrel.

SALRAMENTO, March 30.—Business to day has been exceedingly brick, and the demand for goods spirited. Prices for almost every description of merchandise are finm with an upward tendency. Grain is an exception. We quote barley at 75c. a 75c. Flour is firm at \$6 25. There are many country merchants in market who buy freely.

Manysulle. March 31.—Our streets present quite a lively appearance now. Pack mules and teams through the streets, and are loading for the mines. The diagreeable cold of a few days has given way to a more genial temperature, and men no tonger shiver when they think of venturing abroed. The re-opening of the Downieville road will imprave our trade much, and our ne-relants anticipate that, in another week trade will be fally re-opened.

Another Revolt in the Pacific. ARRIVAL FROM THE LADRONE ISLANDS - TROUBLE AMONG THE CONVICTS.

The Alta Colifornia, received by the Northern Light We learn from Mr. Weston, a passenger in the ship Alexander, which arrived yesterday from the Ladrone Islands, that on the 10th of August a number of convicts, who had been transported from the Philippie Islands to Guajan, the chief of the Mirian group, belonging to Spain, revolted, and were not subdued without some bloodshed. Several of them were summarily executed the same day, and the others were sent to Mamilia for trial The Ladrone or Mirian Islands, are sleeped to the same
